

Creation of the National Steering Committees

A multidisciplinary Steering Committee has been set up in each partner country in order to establish a situation analysis of the existing practices concerning children victims and the legislation on the children hearing in the cases of sexual violence and ill-treatments.

Each Committee is composed by professionals, in the legal, medical, social and psychological fields, police services and child protection services.

For the entire duration of the programme, the different Steering Committees organised several meetings in order to exchange ideas and debate on the topics defined by the partners during the International Meetings.
